# Think Investments. Think Kotak.

## Now everyone else is saying it too.

Our recent Business Leader Award in the Mutual Funds category at the NDTV Profit Business Leadership Awards says this. Our associates have said it. Our distributors say this. Our investors say this. And we have always believed it.

# From CEO's Desk

The month of August 06 has been eventful for markets, the economy and for Kotak AMC as well. The importance of last four weeks lay in the stability it brought to the stock market after the frantic volatility witnessed over the last few months. At Kotak AMC, the NFO of "Kotak Twin Advantage Series III" concluded successfully,

mobilizing more than Rs 310 Cr. from more than 8200 investors. I, on behalf of KMAMC team, express my gratitude to our investors and distributors for their continued support.

Since we talk investment, the sharp correction in equity markets in May-June this year again reminded the investors how relevant that four-letter word R-I-S-K is in investment decisions. The prevalent mood of retail investors indicates cautiousness and has pushed investors to reassess their risk appetite. Such investment market conditions call for prudent risk management while striving to enhance returns. Keeping in line with the changing trend, the new SEBI guideline for Capital Protection oriented Schemes (CPOS) is a welcome move. CPOS allows risk mitigation and equity market participation by merging the features of equity and debt instruments. In addition, the mandated credit rating by an independent agency enables the investor to have reasonable confidence in capital protection warranty offered by the scheme.

As the concerns regarding oil and interest rates subsided, the markets remained largely positive. The US Fed rates remained unchanged in August after 17 consecutive hikes since 2004. This fed pause has had a significant influence on global markets. The inversion in the US treasury yield curve, along with other macro pointers like moderation in core CPI, housing starts, retail sales indicate a probability of a recession

in the US economy. As a consequence, low-cost funds have found their way into the emerging markets. India alone witnessed an FII inflow of about US\$ 1 bn in August. The Indian stock markets rose by 8.81% during the month on low volumes indicating investor skepticism. Much the same, the 10-year government securities saw a decline in its yield and traded below 8% in wake of the subsequent rally. Continuing to subscribe to the long-term growth potential of Indian Economy and Corporate India, we nevertheless believe that the current equity valuations are little over the long-term average and any further rise from here is expected to be largely liquidity driven.

In another major policy initiative, the RBI committee headed by Dr. Tarapore has submitted its 5-year roadmap for the implementation of Fuller Capital Account Convertibility. The implications of the recommendations are profound for the Indian mutual fund industry as well. The Tarapore committee on capital account convertibility has recommended increasing the ceiling for overseas investments by mutual funds.

Needless to say that implementation of these recommendations will mark the onset of next phase of financial reforms, which will further integrate the Indian economy with the global mainstream. This plan of financial reforms would enable Indian investors to park their surplus in foreign assets. Such investments would then be susceptible to currency rate changes, an additional risk in case of a volatile market. I believe this will lead to further specialization of Investment management. In such a scenario, Mutual funds are bound to be the key choice for their consistent, long-term, risk adjusted, superior returns.

Warm Regards

Sandesh Kirkire  
Chief Executive Officer.

## From the Equity Fund Management Team

### Last month - A month of Joy for investors

August has been a good month for equity investors. Volatility changed into a strong upward trend. While Sensex gained 8.9% during the month, mid cap and small cap indices outperformed gaining more than 11%. The strong up move has primarily been a result of strong first quarter corporate performance aided by fast changing interest rate scenario and easing commodity prices, particularly oil.

The best performing sector in this rally has surprisingly been the PSU oil marketing companies. On fears of slowdown in the US, global oil prices have started coming off falling below \$70 from highs of \$79 a barrel. This had its positive impact on the oil marketing companies, which have been reeling under marketing losses. Falling oil prices though had a negative impact on global sugar prices, and this coupled with an expected bumper domestic production this year, sugar sector was under considerable pressure. Banking sector was a strong performer on the back of benign interest rate expectations.

The month was marked by absence of significant political or policy events, which by itself was positive for the markets. On the economy front, industrial growth remained strong and monsoon revival augurs well for the rural farm income. However, there are concerns on both fiscal deficit and current account deficit.

FIs were aggressive buyers for the month at US\$1.0bn compared to net inflows of US\$252.2mn in July '06. Mutual funds were marginal buyers with inflows at US\$81mn compared to net outflows of US\$18mn in July'06.

### Interest rates - an interesting change in outlook

Fears of hardening interest rate have given way to milder interest rate outlook with even possibilities of interest rate cut next year. What has driven this change? Seems to be a classic dilemma of curbing inflation vis-à-vis its impact on economic growth. The US Fed after 17 consecutive rate hikes has paused. Emerging macro-economic data from the US indicates moderation in GDP growth and hence continuation of the dovish monetary stance.

However, a note of caution on interest rates. Any increase in oil prices because of either demand surge, or by a mix of geopolitical / weather issues, could rekindle global inflation worries. On the domestic front, strong credit growth and continued tightening monetary policy could result in interest rates hardening again. However, we believe that the worst of interest rate hikes is behind us for the time being.

### Going Forward:

Indian companies continue to show increased willingness to take risk. The Tata group through its acquisition of a 30% stake of America's Energy Brands for \$677 million in the largest cross-border acquisition by an Indian private sector company reflects Indian entrepreneurial skills translated into new-found aggressiveness. With corporate balance sheets saddled with cash and ability of Indian companies to raise money efficiently and quickly, we expect more global acquisitions.

While markets are in strong momentum, interest rate scenario looks much more benign, corporate performance has been above expectations, and oil prices have started coming off; valuations are not entirely in investors favour in the short term. However, the long term India growth story remains intact. Indian economy remains on track for around 7-8% growth on the back of changing demographics led consumerism, capex cycle, and global competitiveness. Longer term investors should continue to invest through the SIP route.

## From the Debt Fund Management Team

### Major Economic indicators

	Current Month#	Last Month	Change
Inflation (12/Aug/06)	4.92%	4.52%	0.40%
WPI (Points)	204.70	203.70	0.49%
10 YR IGB (Yield)	7.89%	8.24%	-0.35%
10 YR UST (Yield)	4.75%	5.00%	-0.25%
Avg. LAF Bal. With RBI under Reverse Repo (Rs. cr)	36856	47285	-10429
Currency (Rs./\$)	46.54	46.56	-0.04%
India's Forex Reserve (billion \$) (18/Aug/06)	165.37	163.35	2.02

#Current reported period in the month

### Inflation Surges

Point-to-point WPI inflation rose during the month to close at 4.92% against 4.52% in the previous month. WPI for all commodities was up by 0.49% to 204.70 during the month as against 203.70 in the previous month. The spike could be attributed to a rise in prices of certain basic metals, primary articles and food articles.

### BoE and ECB hike rates

The Bank of England surprised the market by hiking its key rate by 25 bps to 4.75% as its economy strengthened and the inflation rose slightly above its target of 2%. The BoE's quarter-point hike was followed by the European Central Bank's raising its interest rates by 25 bps to 3%. The increase, which was widely expected on the back of strong growth momentum, marked the ECB's fourth rate rise since December 2005.

### US Fed & BoJ leave rates unchanged

The Fed's rate setting committee voted 9 to 1 to leave the Federal Funds Rate unchanged to 5.25%. The Central Bank expressed concern about continued inflation risks, however it also said "inflation pressures seem likely to moderate over time."

The Bank of Japan left its overnight call loan rate unchanged to 0.25% on the back of weaker than expected economy growth rate of 0.8% in the second quarter. Faltering exports and a plunge in public spending exacerbated the Japanese economy slowdown.

### Global Crude Oil touches a new high of \$78.65

London Brent Crude hit an all time high of \$78.65 after BP decided to halt oil supplies due to corroding pipelines at its Prudhoe Bay oilfields in the US. The outage sparked fears of supply disruptions in view of violence in the Middle East and prolonged production outages in Nigeria, causing global crude oil prices to shoot up. However, with the ceasefire in the Middle East and supplies having restored, the prices have calmed down to around \$70.

### Index of Industrial Production dips marginally

Slowdown in manufacturing sector and electricity generation pulled down India's industrial growth during June 2006 to 9.6%, as against 11.3% in May 2006. However, IIP for the period from Apr - Jun 2006 climbed to 10.1% from 9.8% during the period from Apr - May 2006.

### Softer US data

The incoming economic data for the month showed signs of US economy slowing down. US Core PPI, which excludes volatile food and energy prices, fell by 0.3% well below expectations of a 0.2% gain. Also the sale of its existing homes fell to a higher than expected 4.1% in July to 6.33 mn units, its sharpest fall since January 2004 against expectations of slowing to 6.55 mn units. Its Q2 GDP growth was revised to 2.90% below market's expectations of 3.00% growth.

### Outlook

Globally the growth outlook continues to be benign. Data from the US, Euro zone, Japan has been milder than expected. Also commodity prices have softened which would translate into lower inflation outlook. These global developments have aided domestic bond market sentiment as well, with the 10yr presently touching a 2 month low of 7.86%. Liquidity conditions have also improved to around Rs. 45000 crs and oil prices have exhibited a southward trend. With this kind of a sentiment, we believe there exist trading opportunities in the market and the 10yr could test 7.75% level. Our portfolios have used cash in line with the bullish sentiments prevailing in the market. The risk to our view however would be higher oil prices, which would once again put the inflation vigilantes on the guard.

If the current trend is any indication, we assign a high probability that the US fed will keep rates unchanged when it meets next on Sept. 20th 2006. Similar results could be expected when the ECB meets to decide on its benchmark rates. These factors lead us to believe that the conditions in the domestic bond market are likely to remain conducive in the medium term. Investors who have a horizon of 6 months and beyond should consider some allocation to long-term gilt and bond funds. For shorter horizons one can remain invested in liquid and short-term bond funds. The debt bouquet can be expected to generate 6.50% - 8.00% in the short to medium term.

# KOTAK EQUITY FOF

Open-Ended Equity Fund of Funds Scheme

Equity Investment  
Philosophy

## About the Scheme

A multi manager FOF scheme that invests 90-100% in diversified equity schemes and rest in liquid schemes. The Scheme invests across multiple fund houses which invests

65%-75% of their portfolio in diversified large cap schemes and 15%-25% in diversified aggressive equity schemes.

### Ideal Investment Horizon

1 - 3 years

### Corpus

Rs. 75.76 crores

## Performance as on August 31, 2006

Kotak Equity FOF NAV: Rs. 21.817 (Growth Option)  
Returns = 1 year : Absolute; Returns > 1 year : CAGR (Compounded Annualised Growth Rate)  
Past performance may or may not be sustained in future.

## Sector Allocation

**Specific Risk Factors :** The investors of the scheme shall bear the recurring expenses of the Scheme in addition to the expenses of the underlying schemes. Hence the investor under the Scheme may receive lower pre-tax returns than what they may receive if they had invested directly in the underlying schemes in the same proportions. • The portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying schemes where the Scheme has invested and will not include the investments made by the underlying schemes. • The portfolio of the Scheme will normally be comprised of schemes of Kotak Mahindra Mutual Fund and other schemes from the recommended list provided by the Designated Agency. Thought adequate care will be taken to ensure that the methodology adopted by the Designated Agency is proper, there may be any analytical error (like assigning overweightage or underweightage to various risk-returns parameters), execution error etc. by the Designated Agency, which may result in the sub-optimal performance of the Scheme. • Since the Scheme proposes to invest at least in 5 underlying schemes, the significant underperformance in even one of the underlying schemes may adversely affect the performance of the Scheme. Investments in underlying equity/debt schemes will have all the risks associated with such schemes.

# KOTAK DYNAMIC FOF

Close-Ended Fund of Funds Scheme

Equity Investment  
Philosophy

## About the Scheme

A close-ended multi-manager FOF scheme, with a maturity period of three years. The scheme allocates assets across the diversified large cap schemes and liquid

schemes in a specific proportion, based on the recommendation received by the designated advisor\*.

### Corpus

Rs. 35.74 crores

## Performance as on August 31, 2006

Kotak Dynamic FOF NAV: Rs. 15.626 (Growth Option)  
Returns = 1 year : Absolute; Returns > 1 year : CAGR (Compounded Annualised Growth Rate)  
Past performance may or may not be sustained in future.

## Sector Allocation

## Specific Risk Factors :

- The Scheme may invest predominantly in diversified Large Cap Equity or Liquid Schemes of Mutual Fund registered with SEBI. Hence the Scheme's performance may depend upon the performance of the underlying equity schemes. Any change in the investment policies or the fundamental attributes of the underlying schemes could affect the performance of the Scheme.
- Investments in underlying equity schemes will have all the risks associated with the underlying equity schemes including performance of underlying stocks, derivative investments, off shore investments, security lending etc.
- Investments in underlying liquid schemes, will have all the risks associated with such underlying schemes including changes in credit rating, trading volumes, settlement periods and transfer procedures; Price/Interest-Rate Risk and credit risk, volatility and liquidity in the money markets, pressure on the exchange rate of the rupee, Basis Risk, Spread Risk and Reinvestment Risk, off shore investments, derivative investments, security lending, etc.
- The investors of the Scheme will bear dual recurring expenses and possibly dual loads, those of the Scheme and those of the underlying Schemes. Hence the investor under the Scheme may receive lower pre-tax returns than what they could have received if they had invested directly in the underlying Schemes in the same proportions.
- The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying schemes where the Scheme has invested and will not include the investments made by the underlying Schemes.
- The dynamic asset allocation may result in higher transaction costs.
- The Scheme is a close-ended scheme and the investors can redeem the units held in the scheme only during the last three working days of every third month from the date of allotment of units, at prices related to Applicable NAV.

# KOTAK BOND

Open-Ended Debt Scheme

Debt Investment  
Philosophy

## About the Scheme

The portfolio of the scheme consists of debt and money market securities, having two plans: Deposit Plan and Regular Plan. The investment strategy is to invest across wide maturity horizons and different kinds of issuers in the debt market, the G-Sec component is normally maintained

between 30% to 50% and it generally does not invest in corporate bonds with less than AA rating.

# KOTAK GILT SAVINGS

Open-Ended Dedicated Gilt Scheme

Debt Investment  
Philosophy

## About the Scheme

India's first dedicated gilt scheme, with an objective to generate risk free returns through predominant investments in the Government of India securities with short-term outstanding maturity and with low interest rate/price risk. The investment strategy involves the average portfolio

maturity being capped at 4 years and a reasonable cash component in bearish markets.

# KOTAK FLEXI DEBT

Open-Ended Debt Scheme

Debt Investment  
Philosophy

## About the Scheme

An income scheme, which invests dynamically, moves the portfolio maturity across the maturity spectrum so as to maximise return. The investment strategy involves investing in Corporate Bonds, Gilts, cash and cash equivalents etc. The scheme endeavors to capitalize on trading opportunities in the market

with active arbitrage across asset classes and yield curve. The internal average maturity is capped at 2 years and 10-20 % of the portfolio is traded with the rest in assets carrying higher yields.

Face value : Rs. 10/Unit  
Dividend distribution is subject to availability and adequacy of distributable surplus.  
After dividend is distributed, the NAV falls to the extent of the payout and statutory levy, if applicable.

# Risk Factors

We declare that we, Kotak Mahindra Asset Management Company Limited, and / or are employees, have short / long positions in the security(ies) in respect of which investment advice is being rendered.

## Risk Factors :

- Mutual Funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Schemes will be achieved.
- As with any securities investment, the NAV of the Units issued under the Schemes can go up or down depending on the factors and forces affecting the capital and money markets. Past performance of the Sponsor/AMC/Fund or that of existing Schemes of the Fund does not indicate the future performance of the Schemes.
- Kotak Mahindra Gilt Unit Scheme '98 (Kotak Gilt), Kotak Mahindra Bond Unit Scheme 99 (Kotak Bond), Kotak Mahindra Liquid Scheme (Kotak Liquid), Kotak Mahindra 30 Unit Scheme (Kotak 30), Kotak Mahindra Balance Unit Scheme 99 (Kotak Balance), Kotak Mahindra Technology Scheme (Kotak Tech), Kotak Mahindra MNC Scheme (Kotak MNC), Kotak Mid-Cap Scheme (Kotak Mid-Cap), Kotak Floater Short Term Scheme, Kotak Mahindra Global India Scheme (Kotak Global India), Kotak Mahindra Income Plus Scheme (Kotak Income Plus), Kotak Equity FOF, Kotak Opportunities, Kotak Floater Long Term Scheme, Kotak Flexi Debt Scheme (Kotak Flexi Debt), Kotak Dynamic Fund of Funds, Kotak Contra Scheme, Kotak Flexi FOF, Kotak Cash Plus Scheme, Kotak Tax Saver & Kotak Lifestyle are only the names of the Schemes and do not in any manner indicate the quality of the Schemes, future prospects or returns.
- Appreciation of the value of the Units issued under Kotak 30, Kotak Tech and Kotak MNC can be restricted in the event of a high asset allocation to cash, when stock appreciates.
- Investments by Kotak Tech in the Information Technology Sector will restrict the diversification of the Scheme due to which the NAV of the Units issued under the Scheme runs the risk of high volatility.
- Technology stocks particularly run the risk of high volatility, high valuation and obsolescence.
- The NAV of the Schemes may be affected, inter alia, by changes in the NAV / performance of the underlying schemes, market, market interest rates, Price/Interest-rate Risk and Credit Risk, Concentration or Sectoral Risk associated with derivatives trading pertaining to Equity Markets, changes in credit rating, Government policy, volatility and liquidity in the money markets, pressure on the exchange rate of the rupee, trading volumes, performance of individual stocks, settlement periods and transfer procedures, Basis Risk, Spread Risk and Re-investment Risk.
- Tax laws may change, affecting the return on investment in Units.
- In the event of receipt of a very large number of redemption requests or very large value redemption requests or of restructuring of the Schemes' portfolios or in case of limitation or suspension of redemption in the underlying schemes, there may be delays in the redemption of Units. Please refer to the paragraph on "Right to limit Redemption" in the Offer Documents.

## Statutory :

Kotak Mahindra Mutual Fund has been established as a trust under the Indian Trusts Act, 1882, by Kotak Mahindra Bank Limited (liability Rs. NIL) with Kotak Mahindra Trustee Company Limited as the Trustee and with Kotak Mahindra Asset Management Company Limited as the Investment Manager. Kotak Mahindra Bank Limited is not liable or responsible for any loss or shortfall resulting from the operations of the Scheme. **Before investing, please read the Offer Documents.**

## NDTV Business Leadership Awards 2006:

The Award aims to felicitate excellence as acknowledged by their respective peer groups.

## Methodology:

MF companies were shortlisted on the basis of criteria like, types/number of products and services offered, rate of return, minimum required investment amount & NAVs. The shortlisted entries further underwent sell and peer evaluation. Weightage was assigned to factors like return on investments, various types of funds and good dividend track record, etc. To arrive at the leader, 5 nominees based on the sell and peer evaluations were presented to a panel of jury, who ranked each of them. **Mutual Fund investments are subject to market risks.**

# Services & Facilities

- **Network of Transaction Acceptance Points:** Submit transaction requests at your convenience across our 27 Investor Service Centres and 48 Transaction Points of CAMS. (To locate these, visit the "Locate Us" section on our website, [www.kotakmutual.com](http://www.kotakmutual.com)).
- **Electronic Credit of Dividends and Redemption Proceeds:** Have your dividend payouts and redemption proceeds paid directly into your bank account\*. No more worrying about cheques lost in transit or queuing at a bank to deposit cheques. \* Available for accounts in the following banks only: ABN Amro Bank, ICICI Bank, Citibank, IDBI Bank, Deutsche Bank, Kotak Mahindra Bank, HDFC Bank, Standard Chartered Bank, HSBC & UTI Bank.
- **Systematic Investments, Withdrawals and Transfers:** Our Systematic Investment Facility provides you with the option of investing a fixed amount over a period of time, in a disciplined manner. Through this process, you benefit from Rupee Cost Averaging (buying more Units at higher NAV), and avoid the uncertainties involved with trying to time the market. Through our Systematic Withdrawal Facility, withdraw fixed amounts, or the entire appreciation on your investment, in any scheme periodically and benefit by averaging out on market fluctuations. To systematically transfer investments from one Kotak scheme to another, try our Systematic Transfer Facility. This tool also helps you manage your investment portfolio among Kotak Mutual Schemes, in line with your asset allocation plan.
- **Internet Transactions:** Switch investments across our schemes, or redeem your investments electronically, through our Internet Transaction Facility. You can also invest in our schemes online, through Kotakstreet ([www.kotakstreet.com](http://www.kotakstreet.com)), ICICI Direct ([www.icicidirect.com](http://www.icicidirect.com)), and Times of Money ([www.timesofmoney.com](http://www.timesofmoney.com))
- **E-mail Communication :** Opt in to value-added information through e-mail: Daily NAV and Dividend Updates, Monthly Updates, weekly and more.
- **Website Utilities:** Plan and track your investments better. Use our Risk Profiler to assess your risk appetite, our Financial Planner to plan investments and financial goals and our Returns Calculator to measure your earnings from Kotak Mutual schemes. Just register, free, at [www.kotakmutual.com](http://www.kotakmutual.com), and access all these facilities.
