

# Kotak Floater Long Term

## About Kotak Floater Long Term

The investment objective of Kotak Floater Long Term is to reduce the interest rate risk associated with investments in fixed rate investments by investing predominantly investing in floating rate securities, money market instruments and using appropriate derivatives. The scheme invests in a mix of high credit quality floating rate instruments, money market instruments and fixed rate instruments which predominantly offer higher carry on the portfolio. Kotak Floater Long Term is positioned in the ultra short term funds category and ideal for investors who seek a high credit quality portfolio and have a three month plus investment horizon.

## Portfolio Action

The liquidity in the system remains scarce by around 90,000-100,000 crores. RBI actions in the forex counter to strengthen the Rupee is being attributed as the key reason for this change. Moreover the relatively slow pace of government spending vis-à-vis the borrowing from the system, too has weighed down the liquidity situation. Consequently, the near term yields in money market have hardened. The scheme also remains inclined to maintain high quality assets in the portfolio and seeks to generate returns from 'steepening gains'. The YTM of the scheme remains at around 9.65%.

## Kotak Floater Long Term\*Performance (%) as on 30<sup>th</sup> December, 2011
