

Kotak Floater Short Term

About Kotak Floater Short Term

The investment objective of Kotak Floater Short Term is to reduce the interest rate risk associated with investments in fixed rate investments by investing predominantly investing in floating rate securities, money market instruments and using appropriate derivatives. The scheme is uniquely positioned to take advantage of the rising interest rate scenario that exists at the short end of the yield curve. Kotak Floater Short Term is suitable for investors with cash surplus who are looking for short term parking of such funds.

Portfolio Action

The liquidity in the system remains scarce by around 90,000-100,000 crores. RBI actions in the forex counter to strengthen the Rupee is being attributed as the key reason for this change. Moreover the relatively slow pace of government spending vis-à-vis the borrowing from the system, too has weighed down the liquidity situation. Consequently, the near term yields in money market have hardened. The scheme consequently remains inclined to maintain high quality assets in the portfolio and seeks to generate returns from 'steepening gains'. The YTM of the scheme remains at around 9.4%.
