

Kotak Opportunities

About Kotak Opportunities

The investment objective of Kotak Opportunities is to generate capital appreciation from a diversified portfolio of equity & equity related securities. It is a diversified equity scheme which has the flexibility of investing in companies across various market capitalization segments (large, mid and small) and across various sectors. It is thus positioned as a flexi cap scheme. The scheme is well positioned to capture various opportunities thrown by the market from time to time across market capitalizations.

Portfolio Action

Our overweight position in IT sector contributed positively to the portfolio as the sector performed well. This was mainly on the back of expectation of a positive US GDP data & depreciation of the rupee. We continued to remain overweight on FMCG sector which remains resilient despite expensive valuations as earnings expectations remains intact & expected decrease in input costs due to negative food inflation & low primary article inflation. We continue to remain overweight on the Pharma sector, which has contributed positively to the portfolio. We also remain overweight on Utilities companies which had attractive valuations, existing productive assets and had good return on investment. We remained underweight on Banking & Finance as high interest rates, increased NPA's & pressure on Net interest margins remain cause of concern in the short term.
